Dear All

We would be having the Interim Project Presentation, details are mentioned below :
Date: 31/10//2022 (31st October,2022)
Timings: Class Timings (9:30 am - 11.00 am)

For slots and venue check the pdf attached.
Total 10 minutes slot, which includes presentation and QnA session. So ideally the presentation should be for around 6 minutes and the remaining 4 minutes are for viva. The number of slides for each section can be flexible, but all the sections are mandatory.

1. Motivation
2. Literature review : Discuss at least two Research Papers, not blogs or articles.
3. Dataset description
a) Different attributes, some visualization, details regarding the dataset.
b) Details regarding any kind of preprocessing is required or not.
4. Methodology.
5. Results/Analysis/conclusion. Based upon work done till now.
6. Timeline, are you able to follow the timeline that you proposed in the proposal and proposing a future timeline.
7. Individual team members' contributions.

You are required to use the **IIITD Slides template** only to build your presentation.

Project Progress report:
Sections for the report, describing your entire work done till now.
1. Abstract: motivation
2. Introduction: describing problem statement.
3. Literature Survey
4. Dataset: Dataset details with data preprocessing techniques.
5. Methodology, model details.
6. Results and analysis.
7. Conclusion: your learning from the project, work left, and each members contribution.

Some important instructions:
This time we will be strict regarding the format, use the CVPR template only that was shared before.
Max length for the report: 4 pages + references.

Try to make it as organised as possible with details so that not much effort is required during the final submissions..

Best of Luck!
